Painted Service Parts

ordering guidelines

Compact Track and Skid Steer Loaders are available in various colors and nomenclatures (brands / model names).

Paint color needs to be specified when ordering painted components. When ordering painted components, inform the support representative of the brand and model name of your machine before selecting the proper color from the list below. The support representative should be able to assist you in finding the correct one based on your machine's **VIN number**. This should help to identify the original machine configuration and nomenclature.

***Note:** Not all colors are available on all components. Available colors are limited to those considered “standard” on your particular machine and component(s). Please do not attempt to order non-standard colors for your machine as the order will not be fulfilled until corrected.

The color codes are to be referenced as a suffix to the part number of the component you are requesting, for example: 0000-000-GRN (indicating a green part).

The following is a list of available colors.

<u>Color</u>	<u>Color Code:</u>
BLACK	BLK (ALL MODELS)
YELLOW	YEY (ASV)
WHITE	WHT (TEREX)
GREEN	GRN (SUNBELT)
GRAY	GRY (TEE)
ORANGE	ORN (ASPLUNDH)

Chapter 7

This exploded view diagram illustrates the assembly of a mechanical component, likely a door latch or hinge mechanism. The parts are numbered 1 through 31. The main components include a large rectangular housing (24), a smaller rectangular plate (22), a long rectangular plate (26), and a complex mechanical assembly (1) that includes a handle (11) and a latch (12). The assembly is shown in an exploded state, with lines indicating the relative positions and assembly sequence of the parts. The parts are distributed across the diagram, with some clustered together and others separated. The numbers are placed in circles next to the corresponding parts.
